

**BREWERS HILL COMMONS PLANNED RESIDENTIAL DEVELOPMENT
EAST SIDE OF BROWN BETWEEN PALMER AND RESERVOIR STREETS, MILWAUKEE, WI**

Development Description and Statement of Owners Intent

This Detailed Plan Development Description concerns the Phase VI on Block "B" of Brewers Hill Commons ("BHC") and meets the intent of the General Plan Description and Statement of Intent which has been previously approved.

Phase VI will consist of approximately seventy (70) units in two (2) separate buildings with a landscaped courtyard between them. The "East" building will be located at the Southwest corner of Brown and Hubbard streets. It will be a total of five (5) floors. The first floor will include approximately twenty-six (26) parking spaces. The upper four (4) floors will contain approximately forty (40) units. The "West" building will be located at the Southeast corner of Brown and Palmer Streets. It will be a total of four (4) floors. The first floor will include approximately twenty-six (26) parking spaces. The upper three (3) floors will contain approximately thirty (30) units. On the South portion of the property there will be approximately thirty-four (34) outdoor parking spaces. Once commenced, construction should take approximately twelve (12) months for each building as set forth in the Development Timetable section of this statement.

Brewers Hill Commons is a planned residential development. The development will combine condominiums, rowhouses and single-family homes. The development site is bounded by Reservoir Street on the south, Brown Street on the north, Palmer Street on the west and Buffum on the east. (Site plan and vicinity map is attached hereto)

Design Guidelines and Condominium Description

Phase VI will consist of seventy (70) new residential units housed in similar four (4) and five (5) story buildings with a landscaped courtyard between them. Units in both the East and West Buildings will range between 700 and 1200 square feet and will contain either one (1) or two (2) bedrooms, one (1) to two (2) baths and at least one (1) parking space per residence. All buildings in this Phase will have a masonry and brick exterior.

All units will be completely new with new appliances, flooring, carpet or tile flooring, central heating and air conditioning, washer/dryer hookups, windows, and lighting. Fireplaces and whirlpool baths will be offered. All these design elements combine to create a contemporary open living space desired by today's marketplace.

The design intent is to create a cohesive urban residential community. The courtyard will provide green space visible and accessible from Brown Street. The site plan, floor plans and proposed building elevations are attached for review.

Site, Public Elements and Parking

Internal roadways, landscaping, lighting and storm sewer lines will be installed by the developer and maintained by the Condominium Owners Association. Sanitary sewer and waterlines will be installed and paid for by the developer and dedicated to the City upon completion. Underground utilities are planned for the entire project.

The storm water retention basins, park areas and common area landscaping will be required to be maintained by Condominium Owners Association, which will be formed by the developer and will include each property owner of

the development. Separate Condominium Owners Association will be formed for the benefit of each phase of the development.

There are a total of eighty-six (86) parking spaces for the seventy (70) dwelling units. This will help insure that street parking in the area will remain plentiful. All parking will be oriented to the inside of the perimeter of the development. Indoor parking will be on the first floor of each building.

Ownership of the Site

Tandem Developers or its affiliates currently own or control the site. After approval of the detail plan requested herein, the Owner will begin its sales effort. Once the pre-sale level required by the construction lender is met, building will commence. When complete, individual units will be transferred to contract purchasers. A condominium owners association will be formed prior to the sale of any units. The developer will control the association until seventy-five percent (75%) of the units have been sold. Thereafter the homeowners will hold all of the association offices and be responsible for the operation of the condominium in accordance with the by-laws and recorded declaration.

The purpose of the Owners Association is to operate the Association within the guidelines of the Declaration and collect monthly assessment from the homeowners for the common area maintenance expenses including but not limited to facade maintenance, maintenance of landscaping, snow removal, painting and capital account for future maintenance.

Development Timetable

Upon meeting the pre-sale requirements, construction on Phase VI will commence. Once started construction should take approximately twelve (12) months.

East Building

Begin Sales	50% of units Sold	Begin Construction	Complete Construction	First Move-in
April 2004	August 2004	September 2004	September 2005	October 2005

West Building

Begin Sales	50% of units Sold	Begin Construction	Complete Construction	First Move-in
September 2004	April 2005	May 2005	May 2006	May 2006

GENERAL NOTES:

1. Study. Discard HOTLINE prior to the commencement of any clearing/grading operations.
2. Clear and lightly dispose of all existing shrubs in areas to be planted with new plant material. Existing trees are to remain unless otherwise indicated.
3. All trees to be planted shall be one inch below top of curb, retaining walls and pavement.
4. All plant material shall conform to American Standard for Nursery Stock as prepared by the American Association of Nurserymen, Inc.
5. All plants to be planted according to the plan and planted in holes at least twice the size of the plant root ball for air.
6. All plantings to be supplemented with a minimum of three inches of mulch over the root ball.
7. Till planting hole to a minimum depth of 6" prior to planting.
8. Topsoil shall be used on the project. It shall be topsoil that is fertile, friable, moist, and free of rocks, stones, sticks, twigs, and other debris. It shall be applied to a depth of 6" over the root ball.
9. All areas disturbed during construction and indicated as "SOIL" shall be seeded and indicated as "SEED" shall be seeded with a bluegrass blend.
10. All plants to receive 3" water, reduce fertilizer, pesticides (or insect) at a rate of 3" per cubic foot of soil and 3" per year.
11. Distribute all plant material, including mulch, and seed for a period of one year.
12. Water all plantings immediately after installation and maintain for a period of 2 weeks following date of completion.
13. All planting bed shall have 6" inch above curb edge.
14. Provide water with a written maintenance schedule within 2 weeks of project completion.
